

HSDL- Load New Job Family

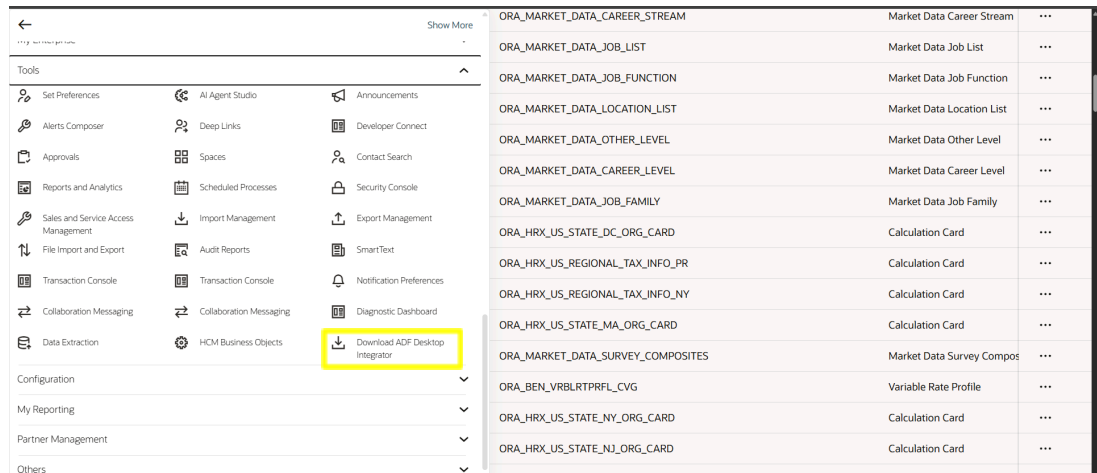

Step 1 : Download Spreadsheet Template:

- Go to **My Client Group** → **Data Exchange** → **Run Spreadsheet Data Loader**.
- Find a pre-configured **Job Family** template.
- Click **Generate Spreadsheet**

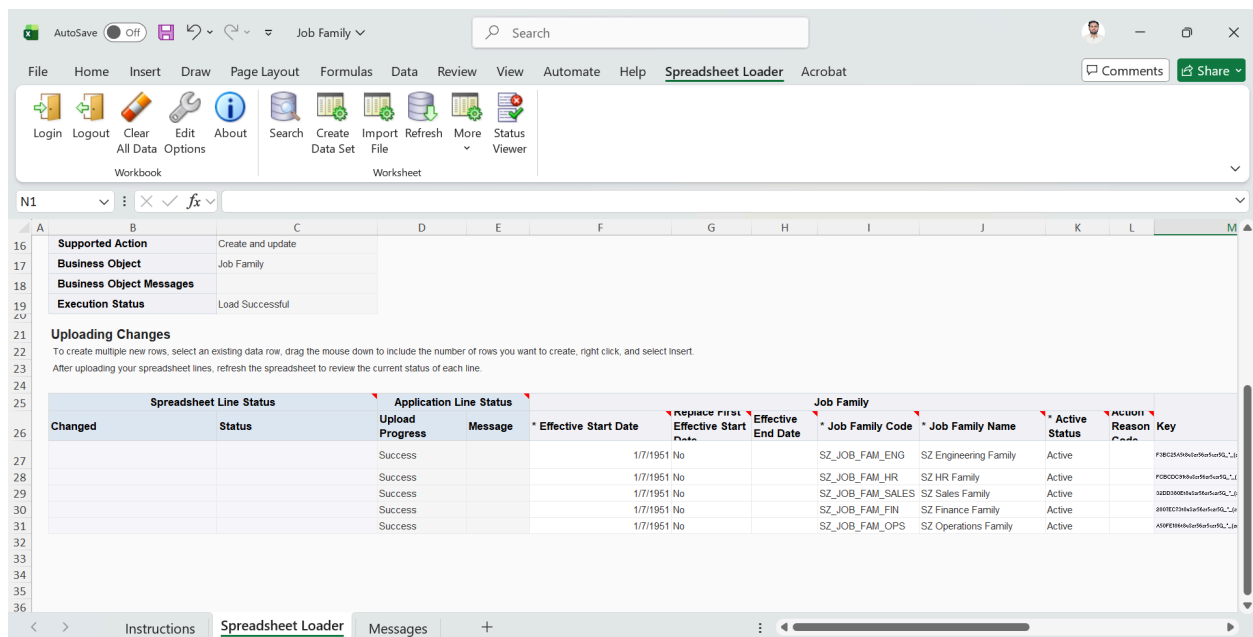

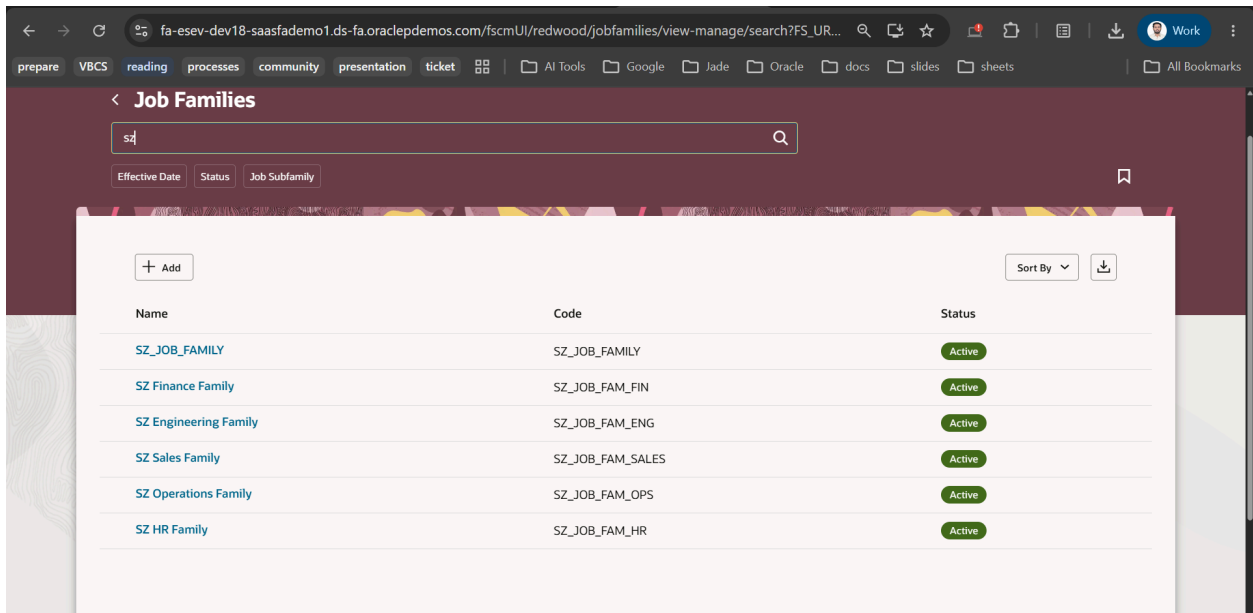

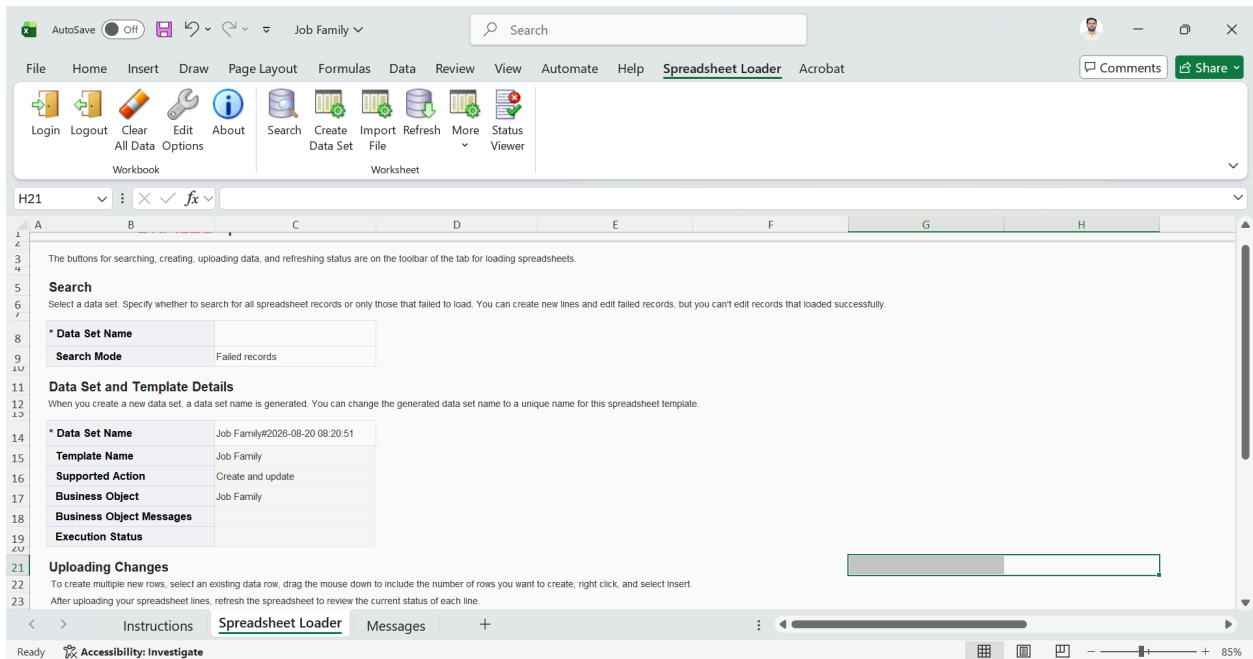

Populate Data:

- Open the file in Excel (ensure the Oracle ADFdi plugin is installed).
 - To download ADFdi plugin, Tools→ Download ADF Desktop Integrator

- Sign in using your Oracle HCM credentials.
- Enter the details of the new Job Family. Along with the information like Job Family Name, Job Family Code, Active Status, Effective Start Date etc.
- After entering data in sheet, click on More>upload
- Check with eros and check status when changed to Success

Changes are reflected in Job Families
